

MANUAL MACHINIST – Job Number 19005

At Angstrom Engineering, we sell industry-leading thin film deposition systems that can be custom designed and are assembled on-site by a team of engineers and technologists who prioritize quality, service, and performance above all else.

We are a growing company looking to break into new markets and to increase our international presence. To assist us in meeting our goals we are offering a position for a Manual Machinist to be part of our assembly team. The ideal candidate will be a people person that can operate a variety of machines to perform assigned tasks. They will also show a keen interest in learning new technologies and taking ownership for improving products and processes.

QUALIFICATIONS OVERVIEW:

- Ability to run machine shop equipment, lathe, milling machine, drill press, saw and TIG welding equipment.
- Resourceful with a proven ability to complete tasks within predetermined deadlines.
- Good work ethic with a positive attitude and desire to work as a team.
- Work in a manner that garners respect from your peers and makes others around you better.
- Ability to take initiative to stay on top of things to allow work to flow smoothly in a busy work environment
- Verify dimensions of parts machined using precise measuring instruments (e.g., micrometers, calipers)
- Adjust and set up mechanical devices such as transfers, manipulators, and actuators.

ADDITIONAL INFORMATION:

Angstrom Engineering is an agile and growing business with a work force of exceptional people. We have been in business for over 25 years and make leading edge and interesting equipment for the field of nanotechnology.

Our working environment is clean, safe, temperature controlled, and enjoyable. We offer flexible hours and a competitive compensation package including benefits. The manual machinist position includes travel and is day shift Monday to Friday with some overtime.
